About This Content

The first module in LOTUS is called “Rails of LOTUS” and is besides “Streets -” and “Wings of LOTUS” one option to unlock driving in LOTUS. “Rails of LOTUS” unlocks rail-bound vehicles of all kind, for example

- Trams
- Railways
- Subways
- City trains
- Cog railways
- Monorails and Overhead trains (Suspension railways)
- Draisine
- Ropeways

- Funicular and Cable cars

LOTUS provides the technical requirements to create vehicles and content of this kind physically and technically accurate. The standard content of the game contains the articulated low floor tram GT6N, which is used in Berlin since 1994, and an affectionate charming map for the first experiences with rails and switches.

During Early Access, this module will also unlock signals and signalboxes.
